

Eskan Bank B.S.C (c)

Liquidity Disclosures - Basel III

30-Jun-22

Introduction:

In August 2018, the Central Bank of Bahrain (CBB) issued its regulations on Liquidity Risk Management (LM). Amongst other things, the LM regulations mandate banks to implement Liquidity Coverage Ratio (LCR) by end of June 2019. The main objective of the LCR is to promote short-term resilience of the liquidity risk profile of banks by ensuring that they have sufficient level of high-quality liquid assets (HQLAs) to honor net cash outflows and survive a significant stress scenario lasting for a period of up to 30 days. As per CBB LM regulations, banks must meet the minimum LCR of not less than 100 percent on a daily basis*.

The below table provides information on Eskan Bank Consolidated LCR for the quarter ended 30 June 2022

*As part of COVID 19 stimulus measures, the LCR limit was reduced by the CBB from 100% to 80% starting March 2020 until June 2022.

*As per CBB LM Module, the consolidated LCR of 974% reported above in line 20 is the simple average of daily LCR during Q2 2022.

Results Analysis and Main Drivers:

Eskan Bank has consistently maintained a robust portfolio of High Quality Liquid Assets (HQLAs) and diversified funding sources to honor all its obligations on a timely basis. During the Second quarter of 2022, the average HQLAs amounted to BD 70 million. Eskan Bank's HQLAs portfolio consists primarily of "Level 1" assets, which represent the highest quality HQLAs, and consists of cash and balances with the Central Bank of Bahrain.

Introduction:

The CBB's Net Stable Funding Ratio (NSFR) regulations became effective on 31st December 2019. The objective of the NSFR is to promote the resilience of banks' liquidity risk profile and to incentivise a more resilient banking sector over a longer time horizon. The NSFR requires banks to maintain a stable funding profile in relation to assets and off-balance sheet activities. A sustainable funding structure is intended to reduce the likelihood of disruptions to a bank's regular sources of funding that will erode its liquidity position in a way that would increase the risk of its failure and potentially lead to broader systemic stress. The NSFR limits over-reliance on short-term wholesale funding, encourages better assessment of funding risk across all on-balance sheet and off-balance sheet items, and promotes funding stability.

Banks are required to meet a minimum NSFR of 100% on a continuous basis. This ratio was relaxed to 80% due to the pressures within the banking sector following the COVID pandemic, However, Eskan Bank still seeks to maintain the original higher 100% requirement.

The below table provides information on Eskan Bank Consolidated NSFR as of 30 June 2022:

*As part of COVID 19 stimulus measures, the NSFR limit was reduced by the CBB from 100% to 80% until June 2022, starting March 2020

Results Analysis and Main Drivers:

Eskan Bank NSFR was at a very comfortable level during the quarter ended 30 June 2022. As end of June 2022, the Available Stable Funding (ASF) stood at BD 931 million compared to the Required Stable Funding (RSF) of BD 635 million, resulting in a NSFR of 147%.

The main drivers behind the Eskan bank strong available stable funding (ASF) are the healthy capital base (40% of the Bank ASF), stable Government account balances and long term borrowing (60% of the Bank ASF). The NSFR ratio of 147% at 30 June 2022 increased from 145% at 31 December 2021, due to an Decrease in Government deposits and a consistently strong capital base.
