Liquidity Disclosures - Basel III 31-Dec-20

Introduction:

In August 2018, the Central Bank of Bahrain (CBB) issued its regulations on Liquidity Risk Management (LM). Amongst other things, the LM regulations mandate banks to implement Liquidity Coverage Ratio (LCR) by end of June 2019. The main objective of the LCR is to promote short-term resilience of the liquidity risk profile of banks by ensuring that they have sufficient level of high-quality liquid assets (HQLAs) to honor net cash outflows and survive a significant stress scenario lasting for a period of up to 30 days. As per CBB LM regulations, banks must meet the minimum LCR of not less than 100 percent on a daily basis*.

The below table provides information on Eskan Bank Consolidated LCR for the quarter ended 31 Dec 2020

^{*}As part of COVID 19 stimulus measures, the LCR limit was reduced by the CBB from 100% to 80% for nine months, starting March 2020.

Results Analysis and Main Drivers:

Eskan Bank has consistently maintained a robust portfolio of High Quality Liquid Assets (HQLAs) and diversified funding sources to honor all its obligations on a timely basis. During the forth quarter of 2020, the average HQLAs amounted to BD 24.059 million. Eskan Bank's HQLAs portfolio consists primarily of "Level 1" assets, which represent the highest quality HQLAs, and consists of cash and balances with Centrals Bank of Bahrain.

^{*}As per CBB LM Module, the consolidated LCR of 165% reported above in line 20 is the simple average of daily LCR during Q4 2020.

Introduction:

The CBB's Net Stable Funding Ratio (NSFR) regulations became effective on 31st December 2019. The objective of the NSFR is to promote the resilience of banks' liquidity risk profile and to incentivise a more resilient banking sector over a longer time horizon. The NSFR requires banks to maintain a stable funding profile in relation to assets and off-balance sheet activities. A sustainable funding structure is intended to reduce the likelihood of disruptions to a bank's regular sources of funding that will erode its liquidity position in a way that would increase the risk of its failure and potentially lead to broader systemic stress. The NSFR limits over-reliance on short-term wholesale funding, encourages better assessment of funding risk across all on-balance sheet and off-balance sheet items, and promotes funding stability. The NSFR must be equal to at least 100% on an ongoing basis*.
