

Eskan Bank B.S.C (c)

Liquidity Disclosures - Basel III

31-Mar-23

Introduction:

In August 2018, the Central Bank of Bahrain (CBB) issued its regulations on Liquidity Risk Management (LM). Amongst other things, the LM regulations mandate banks to implement Liquidity Coverage Ratio (LCR) by end of June 2019. The main objective of the LCR is to promote short-term resilience of the liquidity risk profile of banks by ensuring that they have sufficient level of high-quality liquid assets (HQLAs) to honor net cash outflows and survive a significant stress scenario lasting for a period of up to 30 days. As per CBB LM regulations, banks must meet the minimum LCR of not less than 100 percent on a daily basis*.

The below table provides information on Eskan Bank Consolidated LCR for the quarter ended 31 March 2023

Results Analysis and Main Drivers:

Eskan Bank has consistently maintained a robust portfolio of High Quality Liquid Assets (HQLAs) and diversified funding sources to honor all its obligations on a timely basis. During the first quarter of 2023, the average HQLAs amounted to BD 68 million. Eskan Bank’s HQLAs portfolio consists primarily of “Level 1” assets, which represent the highest quality HQLAs, and consists of cash and balances with the Central Bank of Bahrain.

Introduction:

The CBB's Net Stable Funding Ratio (NSFR) regulations became effective on 31st December 2019. The objective of the NSFR is to promote the resilience of banks' liquidity risk profile and to incentivise a more resilient banking sector over a longer time horizon. The NSFR requires banks to maintain a stable funding profile in relation to assets and off-balance sheet activities. A sustainable funding structure is intended to reduce the likelihood of disruptions to a bank's regular sources of funding that will erode its liquidity position in a way that would increase the risk of its failure and potentially lead to broader systemic stress. The NSFR limits over-reliance on short-term wholesale funding, encourages better assessment of funding risk across all on-balance sheet and off-balance sheet items, and promotes funding stability. The NSFR is calculated in accordance with the Liquidity Risk Management module guidelines issued by CBB. The minimum NSFR ratio is 100%.

The below table provides information on Eskan Bank Consolidated NSFR as of 31 March 2023:

Results Analysis and Main Drivers:

Eskan Bank NSFR was at a very comfortable level during the quarter ended 31 March 2023. As end of March 2023, the Available Stable Funding (ASF) stood at BD 944 million compared to the Required Stable Funding (RSF) of BD 637 million, resulting in a NSFR of 148%.

The main drivers behind the Eskan bank strong available stable funding (ASF) are the healthy capital base (40% of the Bank ASF), stable Government account balances and long term borrowing (60% of the Bank ASF). The NSFR ratio of 148% at 31 March 2023 increased from 142% at 31 December 2022, due to an Decrease in Government deposits and a consistently strong capital base.
